

S P A Z A

SPAZA is a range of functional interior design products for spas and hotels. The name is derived from *space* and *plaza* in which time, space and elegance combine in function.

It all began when we at Runius Design discovered there was the need for mounting beauty products in an attractive and functional manner. As more hotels and spas have chosen our bottle holders to mount their beauty products, we have also discovered other needs and are now launching the SPAZA range.

Our products are manufactured exclusively in Sweden and consist of a single component that is ingeniously fashioned into the finished product. The design is minimalist and follows Scandinavian design and industry traditions. Spaza's customers are style-conscious spas and hotels that focus on design, quality and sustainability.

SPAZA products including wall-mounted bottle and mug holders, hooks and shelves that free up space in showers and bathroom environments and create dedicated space for items such as hair care products, towels and interior design details.

The products are manufactured exclusively in Sweden and consist of a single component that is ingeniously fashioned into the finished product.
